21. FAMILY HISTORY

There is no available information regarding this patient's family. The patient at the time of this examination, July 22nd, 1925 is too far advanced in dementia to furnish any family history. The commitment does not have any information on it.

22. PERSONAL HISTORY

There is no available information regarding this patient's birth, development, adolescence, education, diseases, habits, marriage or mental makeup except what is on the commitment. An abstract of the commitment is made a part of this history and attached hereto.

The commitment states her psychosis occurred 5 years prior to her admission to this Hospital. She had delusions, hallucinations, incoherence of speech, very excitable and had homicidal tendencies. She is married and has five children.

Mrs. Laura Olding, Matron at this Hospital, states at the time of this examination, this patient is clean and tidy in her habits and is a good worker. She talks to herself but her talk is senseless. When spoken to or asked a question she will usually answer. She cannot carry on any intelligent conversation.

She does not know the month or the day. She has a great desire to steal and hid things away. She also inflicts wounds on her legs with pins or anything she can get to hurt her legs. At times she will fight but she is usually quiet. She is a large fleshy woman and is generally quiet and obedient to the orders of the Ward Attendants.

23. PRESENT ILLNESS

The commitment states her psychosis began five years prior to her commitment to this Hospital. She has been at this Hospital continually since November 21, 1898.

24. PHYSICAL EXAMINATION

She is a large, pleasant appearing woman 5' in height and weighs 148 pounds. She sees and hears well. She has no teeth. Tonsils are small and healthy. Throat is normal. She has no goitre. Heart and lungs are normal. Abdomen is normal, no masses and no tenderness. She has no hernia.

CLIENT COPY

no piles and no glandular enlargements. Extremities are normal. Temperature is 98-2/5. Pulse 72. Respiration 18. Blood pressure 125-80. Urine normal. Wassermann negative.

25. NEUROLOGICAL EXAMINATION

Pupils are normal in shape and size and react equally and normally to light. Reflexes both deep and superficial are present, active and normal. Co-ordination, gait, speech and general sensation are normal.

26. MENTAL EXAMINATION

Orientation, memory and insight very poor. Attention divirtible. Marked emotional deterioration. Has delusions and hallucinations. Will-power lessened. Patient chatters to herself most of the time.

27. DIAGNOSIS

Manic depressive psychosis, with Dementia Praecox personality. Advanced dementia.

Dear Mr. Hammett:

In an effort to bring our correspondence file up to date we are writing for verification of your address and your relationship to Susan Hammett who was admitted to this hospital in 1898.

In order that we may know whom to notify in case of illness or death we would appreciate any information you may be able to give us concerning other relatives who should be notified.

Yours very truly,

Dear Mr. Memmott:

The account of Susan A. Memmott has come to us for review. The laws of Utah require that the actual cost of maintaining a patient in the hospital shall be paid by the parents, children, husband, or guardian who are of sufficient financial ability to do so. If they are not able financially to pay the entire cost of this care then we should have information which will justify us in making a charge which may be less than the actual cost of maintenance.

Will you kindly let us know if a guardian has been appointed for Mrs. Memmott. If this has been done we would like to know the name and address of the person appointed. If no such action has been taken will you please inform us as to the nature and extent of her personal property or estate.

Yours truly,
Utah State Hospital

Gentlemen:

You have in the Utah State Hospital, at Provo City, Utah, two of the heirs of the estate of Sarah E. Ivie, Deceased. These persons are Susan A. Memmott and Parley Peck. The estate was a very small one and has been ordered distributed to the heirs. All the assets were reduced to cash and the proportionate part of said cash to which each heir is entitled is specified in the court decree.

The decree provides that Susan A. Memmott shall be entitled to \$41.90, and Parley Peck shall be entitled to \$20.95.

Under the provisions of Section 5417 Compiled Laws of Utah, 1917, the estate of an insane person is liable for the support of such insane person at public charge, and the board is authorized and empowered to collect from the estate any sum paid by the state in ~~their~~ his or her behalf. Therefore, I have concluded that in the interest of all concerned the board is the proper authority to receive and take charge of the distributive shares of these heirs, and I am enclosing checks drawn favor of the Utah State Hospital for the respective amounts above specified.

Kindly sign the enclosed receipt so that I may present same to the court on application for discharge of the administrator.

Very respectfully yours,

Graber A. Giles
Attorney for Administrator.
